

## UNIT 2 – GAUSS'S LAW

## 2.2 Electric Flux and Gauss's Law: Spherical Symmetry

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Placeholder worksheet for the site prototype. Free for classroom use.

1. A closed surface encloses point charges  $q_1 = +2.0$  nC and  $q_2 = -5.0$  nC (and a third charge of  $+7.0$  nC sits outside). Find the net electric flux through the surface.
2. An insulating sphere of radius  $R$  carries charge  $Q$  spread uniformly through its volume. Use Gauss's law to find  $E(r)$  for  $r < R$  and for  $r > R$ .
